

## TRAFFIC LIGHT VIEWER

The traffic light viewer, package number 984936, contains following parts which should be checked before starting installation:

1	519424	Retainer Assembly - Traffic Signal Light Viewer
1	519426	Support - Traffic Signal Light Viewer Mounting
1	897593	Viewer Assembly - Traffic Signal Light

### INSTALLATION INSTRUCTIONS

1. Position viewer mounting support on rounded section of dash panel directly over speedometer. Be sure contour of support matches contour of dash panel. Using support as a template, center punch dash panel and drill one hole of size shown on diagram.
2. Position viewer assembly and support on dash panel by inserting bolt on viewer assembly through support and dash panel.
3. Install retainer on bolt from back side of dash panel. After retainer is started on bolt, retainer and support must be positioned against the dash panel and final tightening operation done by turning bolt on viewer assembly.
4. Turn viewer assembly so that screw heads and slot in base face front of car.

VIEWER ASSY.
